ABSTRACT

Abstract

1 INTRODUCTION

Intro to Clouds and holes and need for distinction

2 INPUT CATALOGUE

Describe catalogue (Fuller & Peretto) Spitzer & Herschel
Hi-Gal observations

Number of objects etc.

3 ANALYSIS

Brief outline of analysis

3.1 MilkyWay Project

MWP interface and initial results (or in results section?)

User and classification numbers and duration of dataset used

Raw classifications? Histogram of results?

Thumbnail examples of clouds, holes and unknowns

3.2 Experts and Training data

Definition of training data definition

Thumbnails of training data and classifications

Expert versus general results (plot)

3.3 Analysis sequence

The procedure Growth charts Results of MC runs Any
thresholds

4 RESULTS

Results from analysis (cloudiness chart)

Histogram of classifications before & after

Thumbnail examples of clouds, holes and unknowns

Full table of results

5 CONCLUSIONS

6 ACKNOWLEDGEMENTS

Herschel is an ESA space observatory with science instruments provided by European-led Principal Investigator consortia and with important participation from NASA.

SPIRE has been developed by a consortium of institutes led by Cardiff Univ. (UK) and including: Univ. Lethbridge (Canada); NAOC (China); CEA, LAM (France); IFSI, Univ. Padua (Italy); IAC (Spain); Stockholm Observatory (Sweden); Imperial College London, RAL, UCL-MSSL, UKATC, Univ. Sussex (UK); and Caltech, JPL, NHSC, Univ. Colorado (USA). This development has been supported by national funding agencies: CSA (Canada); NAOC (China); CEA, CNES, CNRS (France); ASI (Italy); MCINN (Spain); SNSB (Sweden); STFC, UKSA (UK); and NASA (USA).

This research made use of APLpy, an open-source plotting package for Python hosted at <http://aplpy.github.com>
